MEZCAL

AGAVE ANGUSTIFOLIA *Espadin* | *Chato*

Almost 90% of mezcals are made with Agave Angustifolia. The Espadin coming from Oaxaca is what gave mezcal its fame, more or less. These plants mature in about 10-12 years, are hardy and produce a lot of sugar and juice to make mezcal with. Espadin is the perfect agave to showcase mezcal's classic flavors of floral and ripe fruit, herbaceous earth and smoke. Chato is synonymous with Espadin from Jalisco, but is not included as one of the states for making mezcal and thus must be called Destilado de Agave.

PECHUGA

The "Pechuga" style is a very special style of mezcal intended to celebrate the harvest and other monumental events. The mezcal is steeped with fruits and spices then redistilled with a piece of meat, most commonly a poultry breast suspended in the still. As the vapor moves through the breast the flavors of the herbs and fruit become softened and the mezcal gains a rich, silky mouthfeel. Now we see people making pechugas with all sorts of meats and vegetables. These mezcales are rich with fruits and spices and sometimes even a little gamey. Delicious!

MEZCAL

AGAVE POTATORUM *Tobala*

The Tobala is the sweetheart of the agave world. These agaves are adorably small with beautiful broad leaves, its piña itself is about the size of a pumpkin. They grow in the wild nestled in the shade of oak trees up in highly elevated rocky terrains; like a truffle of the agave world. They boast long roots that break through limestone rocks contributing in search of nutrients. These mezcals are delicate, lightly sweet with briny notes and tropical fruits. They are endlessly complex with long, long finishes.

5 Sentidos Tobala - Mezcalero: Israel Palestino Birthday cake frosting and a buttery sake flavor.....	14

AGAVE CUPREATA *Cupreata* | *Papalome*

The genetic grandparent of the famed Tobala agave. These are short and stocky with broad leaves and generally a little larger than tobala. They are found mostly growing wild in Michoacán and Guerrero. Certain regions call mezcal made from cupreata "Papalomé," meaning butterfly. They lean towards earthy and a bit savory, along with the usual delicate, fruity and floral characteristics associated with mezcal.

5 Sentidos Papalote - Mezcalero: Antonio Sonido Scents of sweet herbs, cream corn and caramelized pastry.....	14

MEZCAL

ENSAMBLES *Blends*

Ensemble is a technique used by skilled mezcaleros that allows them to assemble different agave varieties roasting for one single batch. Like a painter, they can pick and choose through a variety of agaves to achieve the flavor profile they would like. Some argue that this style demonstrates what mezcal was like many many years previously when whichever agave was ripe was what was roasted and produced. They really run the gamut of flavors since there is no rule but extreme nuance is guaranteed. Blending occurs when the spirits are mixed postdistillation.

AGAVE SALMIANA *Salmiana*

This agave plant is huge with leaves that are thick, dark green with a large point at the tip and strong spines on the edges. It takes about 7-10 years to grow and can be found in the highlands of Coahuila, Durango, and San Luis Potosi. These agaves are known for their unique green and funky flavors. Unlike most mezcal that we know as being cooked underground in earthen ovens, in San Luis Potosi, it is traditional to cook the agave in above ground clay ovens similar to tequila that make some of these spirits lack the traditional smoky notes of other mezcals, but for what they lack in smoke they make up for in vegetal, mineral, robust flavor.

AGAVE TEQUILANA *Blue Weber*

Most notably known for the production of tequila, Agave Tequilana is also distilled by mezcaleros with traditional mezcal processes. The result is a spirit that more accurately resembles what Tequilas used to taste like.

Derrumbes Zacatecas - Mezcalero: Jaime Bañuelos Lightly floral with raspberry and papaya.....	10
Neta Tequilana - Mezcalero: Tequilana Roasted peppers, acorn squash and honeycomb.....	25

MEZCAL

AGAVE KARWINSKII *Madrecuixe* | *Barril* | *Tobaziche* | *Etc*

Karwinskii agaves are almost Doctor Seuss-like with a short stalk that the agave piña and leaves grow on top of, almost resembling a small palm tree. The importance here is the stalk can also be roasted, fermented and distilled along with the piña. There are less sugars and thus less juice so this results in mezcals that are drier, more tannic, herbaceous and not quite as fruity and floral as others, though still plenty complex and delicious.

RAICILLA *Lechuguilla* | *Inaequidens* | *Maximiliana* | *Etc*

Raicilla is made in Western Jalisco. Raicilla can be made from many different types of agave that are scattered across the landscape. These varied agave species, along with great diversity in terroir, equipment and techniques, give Raicilla an amazing spectrum of flavor. The humid environment results in bacteria activity which affects the fermentation and can make Raicillas very funky and acidic. Raicilla can range from overripe papaya and green grass to blue cheese and brine. A real wild ride!

MEZCAL

AGAVE AMERICANA Arroqueno | Sierra Negra | Coyote

Giants, up to 10 feet wide! Arroqueño is the genetic mother of the Espadín and can take upwards of 20 years to mature. Along with the typical tropical fruit notes, the mezcals can be earthy, funky and a touch herbaceous. Their abundance of sugars keeps all the flavors in balance, even at higher proofs. This species is found most commonly in Oaxaca and Puebla, but can be found hiding in other places.

AGAVE RHODACANTHA Dobadaan | Mexicano | Cuixe | Ixtero Amarillo

The Rhodacantha agaves are dispersed throughout the Western part of Mexico and grow quite large with large teeth on their pencas. This species has a preference for foothills and pine forests. They produce some of the more intense mezcals and are good if you're seeking something on the smokier, oily and herbal side.

AGAVE CONVALLIS Jabali

The rare Agave Jabali is extremely hard to work with: it foams and expands during fermentation and distillation, which has led to some stills being damaged during distillation as the spirit has been known to burst out of the seams of the still. This agave has a distinctly wild attitude, and many of the Jabali mezcals that can be found in Oaxaca are still somewhat chaotic and unrefined. But with crazy and unpredictable fermentation comes abundant flavor! Creamy yet acidic, floral green melon.
